1- About company:

a. Specialization:

IT-STANDARD is an Egyptian information technology company originally established for developing advanced level of interactive IT solutions specifically web services, web applications, websites, mobile apps., and business solutions for companies and institutions plus offering consulting services in the same fields of work specializations. We target achieving high quality standards and ideal accelerated performance for customers' various activities.

b. Start & Foundation:

The company has begun informally in late 2012 until it was formally established by the Egyptian General Authority for Investment in September 2014 in accordance with Egyptian law.

c. Company name:

The company name "IT-Standard" carries two shortcuts

- IT (Information Technology): refers to information technology solutions.
- Standard: refers to the standard efficiency in quality and performance that meets customer requirements and which characterize our products.

So, the company name "IT-Standard" should mean "IT solutions with standard quality".

d. Logo:

- The blue flower 

e. Official website:
